

Even if you do not read this disclosure, you will still be held to the policies outlined by it.

Course Description - THESE ARE COLLEGE COURSES! They follow the syllabi and guidelines used for the corresponding courses at Salt Lake Community College. This information and other helpful hints are available at www.slcc.edu/math. The problems assigned are considered the minimum required for sufficient understanding of the material and students are encouraged to work through more than those assigned. It is ultimately the student's responsibility to make sure that prerequisites are fulfilled, the entire application process has been completed, and the concepts have been mastered. It will be very important that you attend class, pay attention, do the assignments, ask questions, and read the text. Putting forth an honest effort will virtually guarantee success in this class. Grades will be earned based on the points you accumulate on several different types of assessments:

Homework/Projects - Approximately 20%.

Each homework assignment will be graded on the following scale:

5 points total: 3 points for complete and accurate work on all problems, 2 points for accuracy on spot-checked problems.

Quizzes/Citizenship - Approximately 5%. Citizenship includes attendance, punctuality, on-task behavior, initiative, and participation. Classroom rules and consequences are posted in the classroom. **Each tardy will result in a 1% grade decrease.** Students who are tardy on the day of a quiz will receive a zero on the quiz. Quizzes may be unannounced.

Midterm Tests - Approximately 50%. (Exams will be given at the end of each unit and may be comprehensive.)

Final Exam - Approximately 25%. **(The final is comprehensive and must be passed with at least 60%. Otherwise, a D is the highest grade that can be earned in the class.)**

Advanced notification for absences on test day is required. If advanced notification is not given, the student **will not** be allowed to make up the test. A phone call, e-mail, or written message from a parent with a return number will suffice. There are **no exceptions!**

Grade Scale -

A 100-93%	A- 92-90%	B+ 89-87%	B 86-83%	B- 82-80%	C+ 79-77%
C 76-73%	C- 72-70%	D+ 69-67%	D 66-63%	D- 62-60%	F below 60%

Courtesy Passes - To reduce the number of late assignments, each student will be given four "Courtesy Passes" per semester. A pass may be used to turn in a late assignment. **Late assignments will not be accepted without a courtesy pass and will not be accepted at all after the unit test on the material covered on the assignment.** At the end of the semester, the unused passes can be turned in for 5 points each (a maximum of a 2% grade increase). This can make a big difference in a student's grade, so use them wisely.

Makeup Work – Any assignments that were due on a day a student is absent must be turned in the day he or she returns. Students will be given one extra class period to complete assignments that are assigned on the day of an absence. Students who are absent on the day of a quiz or test must arrange to take it within a week of the day it was given.

Bingham High School Policies – All Bingham High School policies will be strictly enforced, including the attendance policy, dress code, electronics policy, and all other school rules.

TIPS THAT WILL HELP MAKE YOU SUCCESSFUL IN THIS CLASS:

1. This is a college class and it requires college-level commitment. **YOU MUST BE PREPARED TO WORK HARD!** If you are uncertain whether you are ready for a class of this nature, you may want to carefully reconsider your enrollment (especially if you're a junior).
2. Do the assignments right away. Some students are tempted to put off the assignments until the last minute. This always leads to trouble. (Examples of trouble: poor test scores, poor grades, loss of high school credit, an F on your transcript that lowers your GPA, W or E on a college transcript, starting your college career with a low GPA on your transcript, loss of financial aid, etc.)
3. Be willing to ask questions. Learning to ask questions in a familiar environment (high school) is much easier than trying to learn that skill in an intimidating environment (college campus).
4. If you're having trouble or issues, tell the person who can help the most...your teacher. If the teacher is unavailable, use a study group.
5. Do the review assignments for every test and follow the rules for late assignments.

6. Pay attention to details. There are lots of things to keep track of in this course. One of the best skills you can learn in a math class is how all the little details fit into the big picture. Practice this on every assignment.

SLCC General Education Statement

This course is part of the General Education Program at Salt Lake Community College. This course is designed not only to teach the information and skills required by the discipline, but also to develop vital workplace skills and to teach strategies and skills that can be used for life-long learning. General Education courses teach basic skills as well as broaden a student's knowledge of a wide range of subjects. Education is much more than the acquisition of facts; it is being able to use information in meaningful ways in order to enrich one's life. While the subject of each course is important and useful, we become truly educated through making connections of such varied information with the different methods of organizing human experience that are practiced by different disciplines. Therefore, this course, when combined with other General Education courses, will enable you to develop broader perspectives and deeper understandings of your community and the world, as well as challenge previously held assumptions about the world and its inhabitants. Math 1050 fulfills the Quantitative Literacy (QL) requirement at SLCC.

Concurrent Enrollment Memorandum of Understanding

I understand that:

1. I am enrolled in a college level class and it demands the responsibility and maturity expected of a college level student.
2. The content of this course will be appropriate for college level students. To be successful, I should plan on studying for approximately 2 hours for each hour spent in class.
3. I will be graded by a college-level grading standard; any late or makeup work will be allowed at the instructor's discretion.
4. **If I score lower than 60% on the final exam, then the highest grade I can receive is a D. To advance to the next math CE class I must successfully complete this class with a grade of C or better.**
5. Cheating will not be tolerated. Any student who participates in cheating will receive a zero for that work. A second instance of cheating will result in a failing grade for the semester. I know what constitutes dishonesty and cheating. I will not participate in any dishonest activities.
6. Regular classroom attendance and participation are required, and failure to attend and participate will affect my grade.
7. It is my responsibility to submit my SLCC Application Form, a signed SLCC Memorandum of Understanding, application fee, partial tuition, and qualifying test score by the specified date in order to receive college credit for this class.
8. **I can only change my class during the first four days of each high school quarter.** If I withdraw from the class after that time I will receive an "F" grade for the high school quarter. Registration at the college takes place about one month after the semester begins. If I withdraw from the class after registration has occurred at the college I will receive a "W" or an "E" on my college transcript which counts as 0.0 on my grade point average and may affect my ability to obtain financial aid. It is my responsibility to take care of registration and withdrawal if it becomes necessary. Furthermore, I understand that I must obtain the instructor's permission (this means I must actually speak to my instructor) to officially withdraw from a concurrent enrollment class.
9. It is my responsibility to confirm that my concurrent credit will transfer to the higher education institution I plan to attend.
10. The final semester grade I receive on my BHS transcript is the same grade that will be transmitted to SLCC.
11. I realize I will not be allowed to retake a concurrent enrollment class in high school.
12. Graphing calculators will not be allowed on any exam in Math 1050. I must have my own graphing calculator for Math 1060 (TI-83+ or TI-84+ preferred). Calculators with a computer algebra system (CAS) may not be used at any time.
13. I will be expected to create an on-line "ePortfolio" and submit signature assignments for my general education courses.
14. If I sluff, I will not be allowed to make up any work missed that day.
15. If I must miss class, I should notify the teacher in advance. Arrangements can usually be made to get the necessary information.
16. Occasionally students are asked to trade papers when correcting. The teacher corrects all tests. Student-corrected assignments will be randomly collected and checked. If I have called an incorrect score, I will need to immediately produce all of the past assignments so they can be checked for accuracy. Zeros will be given for all assignments that cannot be immediately verified.
17. Electronic communication and entertainment devices should not be used in any way in class. Each time one is used, seen, or heard in class, the device will be confiscated, and parents will be contacted.
18. I must buy the textbook.
Math 1050: College Algebra, 9th ed., by M. Sullivan, Pearson/Prentice Hall
Math 1060: College Trigonometry, by C. Stitz & J. Zeagar. Available free at <http://www.stitz-zeager.com/>.
19. A partial tuition cost of \$5 per credit hour is now associated with each concurrent enrollment course. This partial tuition is due at the time of class registration and it is my responsibility to ensure that it is paid.

Mrs. Lambourne
Math 1050/Math 1060

I have read and understand the above outlined guidelines and disclosure for Concurrent Enrollment math and agree to conduct myself accordingly:
